

Explanation of competition determination Halve van Helmond Business Run

As a company you can register one or more teams for the half marathon and/or the 10 km.

A team consists of 3 to 5 participants.

The sum of the times of the three fastest runners per team determines the position in the standings. The team with the lowest time wins.

If a team consists of 3 participants, all participants must finish. With a larger team, one or two participants may drop out.

The timekeeping is done by means of the MYLAPS BibTag chip.
